

Stainless steel knurled band

- The knurled band is to be associated with its tilting screwing head. The assembly of the two allows to have a custom size clamp, its clamps are made with a stamped rack band along the entire length of the tape, with raised and rounded edges. These clamps are used to fix protective covers on cable trays, but also to fix panel ventilation ducts, flexible outdoor ventilation ducts.
- Material 430 stainless steel.
- Delivered on a cardboard dispenser.
